

circa *SV*. Vnde ex æquali, habemus rationem portionis fusi ad portionem annuli. Tertio habemus centrum grauitatis prædictæ portionis annuli ex cit. prop. 18. lib. 4. Ergo quartum, nempe centrum grauitatis portionis fusi non ignorabitur.

Sed nec in sequenti figura, supposita femiparabola *EBA*, secta duabus lineis *HN*, *LP*, diametro *EB*, parallelis, ignorabimus centrum grauitatis segmenti fusi ex segmento intermedio *HNPL*.

Nam
