De tecto porticus theatri.

Cap. VII.

Tectum porticus, quod futurum est in summa gradatione, cum scena altitudine librati pfe aatur, tō q̄ uox crescens æq̄liter ad sumas gradationes, & tectū pueniet, Nāq; si nō erit æquale, quo minus fuerit altū, uox p̄ripietur ad eā altitudinem, ad quā pueniet primo, Orchestra inter gradus imos, quā diametron habuerit, eius sexta ps sumatur, & in cornibus circūq; aditus, ad eius mēsurā pp̄ediculū inferiores sedes p̄adatur, & quā p̄asio fuerit, ibi cōstituatur itinerū sup̄alia, ita. n. satis altitudinē hēbūt, eorū cōformatiōes, Scenā longitudo ad orchestra diametrō duplex fieri debet. Podii altitudo ab libramēto pulpiti cum corona & lyst, duodecima orchestra diametri, Supra podium colūnā cū capitulis & spiris altā quarta pte eiusdē diametri, Epistylia & ornāmēta earū colūnarū altitudinis q̄nta pte, Pluteū isup cū unda & corona inferioris plutei dimidia pte, supra id pluteū colūnā q̄rta pte minore altitudine sint, q̄ inferiores. Epistylia & ornāmēta earū colūnarū q̄nta pte, itē si tertia episcēnos futura erit, mediā plutei, summū sit dimidia pte, Colūnā sumā mediana rū minus altā sint, q̄rta pte. Epistylia cū coronis earū colūnarum, itē habeāt altitudinis q̄ntā pte, Nec tamē in oibus theatri symmetrie ad oēs rōnes, & effectus possunt respōdere, sed oportet architectū adauertere q̄bus pportionibus necesse sit seq̄ symmetriā, & q̄bus rōnibus ad locā naturā aut magnitudie opus debeat tēperari, Sunt enim res quas, & in pusillo, & in magno theatro necesse est eadem magnitudine
